

**WORKSHOP FOR PARENTS AND PROFESSIONALS /
WORKING WITH CHILDREN**

Šestinski vijenac 2, Zagreb, Croatia

28 - 31 May, 2016

Free FI lessons for children with disabilities and participants

Instructors: Nancy Aberle (Switzerland) and Lynn Bullock (France)

Languages: English and Croatian

Theme: **VISION, MOVEMENT COORDINATION, LEARNING**

In May 2016, Nancy and Lynn will give the fifth Feldenkrais Seminar for Parents and Professionals in Zagreb about working with children. The workshop is going to present some of the strategies how parents and professionals can work with babies and children with disabilities. They often need support to learn movement progressions that other children experiment with spontaneously. Parents and professionals will learn how to apply techniques and use ideas from this gentle non-invasive method to *help children play with every subsequent developmental milestone*

Dr. Moshe Feldenkrais said: "Every emotional state corresponds to a person's conditioned pattern of muscular contractions." ***The use of our eyes and our hands are directly affected by our conditioned pattern of muscular contractions.***
